

Chameleon

Chameleon™ is designed for small to medium-size construction companies. It captures, routes, stores, and retrieves within easy access, all documents in a construction office. Applications are available for Accounts Payable invoice routing and approval, Job Files Management, Human Resources, and more.

Captures

Chameleon gives you the ability to easily scan or import all of your construction related documents.

Routes

Documents within the Chameleon system can be easily routed for approval or review. Chameleon provides a tool to know who a document is currently assigned to, and where the document is in the routing process.

Chameleon offers all of the following features:

- Easy to use functionality
- Cabinets:
 - A/P Invoice Routing and Approval
 - Job Files Management
 - Human Resources
 - Custom Cabinets are available
- Seamless integration into most accounting packages
- Workflow-Route documents for review and approval
- Content Management for PDF, Word, Excel, photos, emails, etc.
- Legal Compliance and backup

“While a paper-free office may have been our original goal for our Chameleon installation, the results have been a phenomenal improvement in invoice retrieval, improved staff morale, and fewer filing cabinets.”

- Eire Stewart
JP DiNapoli Companies

Stores

Chameleon has an easy way to store documents by multiple criteria, such as; Job #, Document Type, Invoice #, PO #, or any user defined fields.

Retrieves

Any user with proper access and authority can easily retrieve documents stored in the system through the user defined fields.

Integrates

The seamless integration into most accounting packages allows you to capture accounting information minimizing key strokes and data entry errors.
